Deposit Seed Co.
DEPOSIT, NEW YORK

SEASON 1940

It is with deep sorrow that we announce the death of Mr. J. J. Bell on November eighteenth, 1938. Mr. Bell had been engaged in the seed business for over sixty years. He had served as manager of Deposit Seed Co. since 1909. His work will be carried on by those who have been closely associated with him through the years. We pledge to you the same courtesy and efficient service you have received in the past.

MORNING GLORY

CLARK'S EARLY HEAVENLY BLUE. We have chosen this Morning Glory for our cover because we believe it to be the most beautiful annual vine available. The beautiful sky blue of the Heavenly Blue Morning Glory is unquestionably one of the loveliest shades in any flower, a beautiful sky blue color which shades at the center to a golden throat. These flowers are very large of the characteristic Morning Glory form, and flowers are open and in the fullness of their glory of color ten to twelve hours every day, closing very late in the afternoon. Pkt. 10c.

CRIMSON RAMBLER. Deep crimson morning glory. Free flowering, rapid grower, similar to Scarlett O'Hara but climbs more readily. Pkt. 10c.

GIANT FRINGED JAPANESE. Large blossoms, 6 inches across, zoned, striped and spotted in the most artistic manner. Petals often cut frilled and fringed. Colors very brilliant, varieties almost endless. All colors mixed, Pkt. 10c.

SPECIAL COLLECTION. One packet of each of the above three Morning Glories for 25c.

Miniature Ageratum

Cuphea Firefly

A tender annual flowering readily in twelve to fourteen weeks from seed and blooming profusely throughout the summer months. Small delicately formed flowers of fiery cerise red are freely produced on compact plants which reach a height of about 10 inches. The general effect of the plant when in full bloom is a ball of fire. Suitable for rock gardens, window boxes, flower pots or as a border or edging plant. Pkt. 10c.

ZINNIAS

HOLLYHOCK Annual Indian Spring

Indian Spring is one of the loveliest entries in last year's All-America Selections competition. It blooms the first year in less than five months after seed is sown. A profuse bloomer there is a colorful display of the semi-double, crinkly edged flowers for several weeks during the summer. After the first bloom is past, if the plants are cut back they will produce a second crop of blooms the same season. While rose-pink predominates, variations will occur from a light pink to an almost crimson rose shade. Normally 3 1/2 to 4 ft. tall, plants may grow as high as 6 ft. in some sections. Pkt. 10c.

Zinnia, Linearis

Radio. Flowers when first open have somewhat of a star-like appearance but as they mature they become round full and measure about 5 inches across. Petals are partially quilled or fluted. Pkt. 10c.

Linearis. The most unusual and interesting of the newer Zinnias is this dwarf variety. Flowers which are single are a lovely shade of golden orange with a delicate lemon yellow stripe through each petal while the center is dark brown in the young flowers turning golden orange as the pollen develops. It is very early blooming, starting to flower 6 weeks after seed is sown. This plant is suitable for border or edging and is excellent for window boxes or in any part of the garden where a dwarf growing plant with brilliant coloring is desired. Pkt. 10c.

All seeds require Warmth and Moisture to sprout and some hard shelled ones should be soaked in water overnight before planting. Some seeds under good conditions will sprout in 4 to 5 days, others require two weeks and some a month. A few like Hardy Phlox, Trollius, Peonies, etc., will do better if frozen in the ground over winter.

Where are Seeds Grown?

All seeds cannot be grown successfully in one locality. To produce a perfect crop, a variety must be grown where it develops best. Nearly all the carrot, lettuce, onion and sweet pea seed used is grown in California. Most of the Muskmelon in Colorado, the Watermelon in the south. Many choice flower seeds have to be grown in Europe, etc. We have good growers where seeds can be grown to the greatest perfection.
